# BACKGROUND

**PROJECT NAME : PEARLORA**

**PROJECT TYPE : EFFICIENT TOURIST SOLUTION**

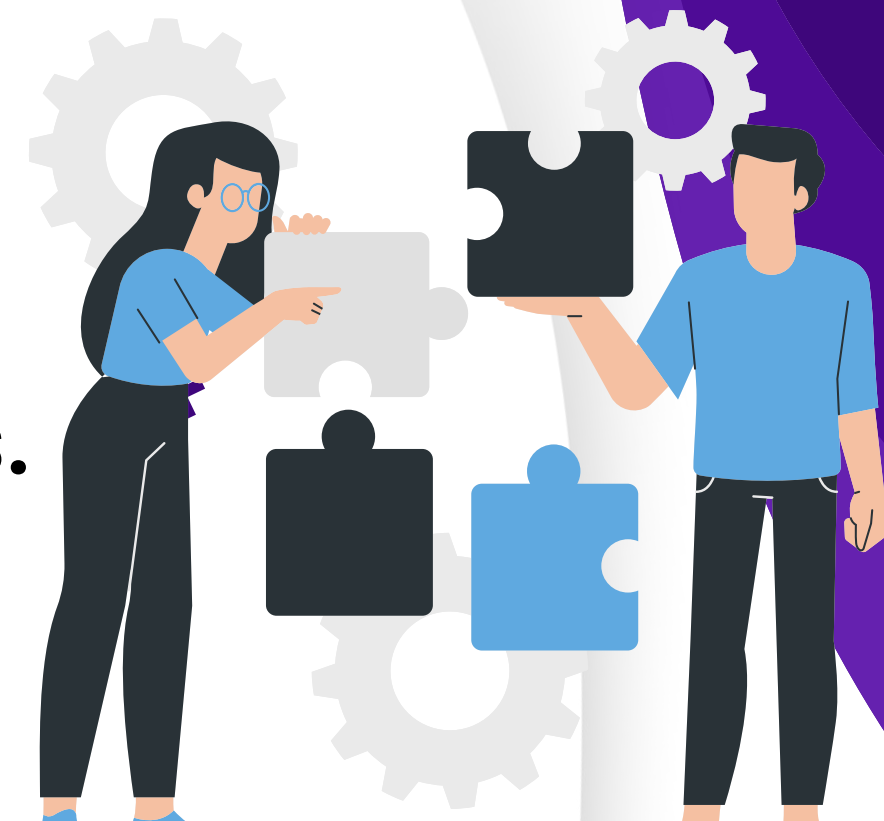

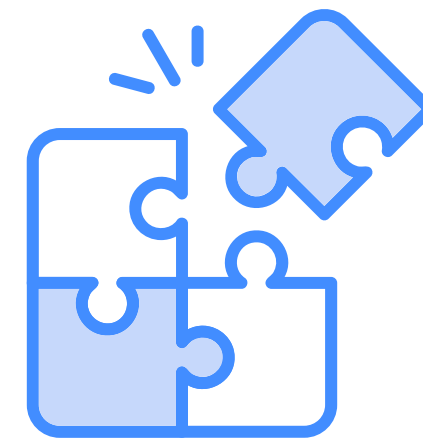

**FOCUS : TRAVEL AGENCY**

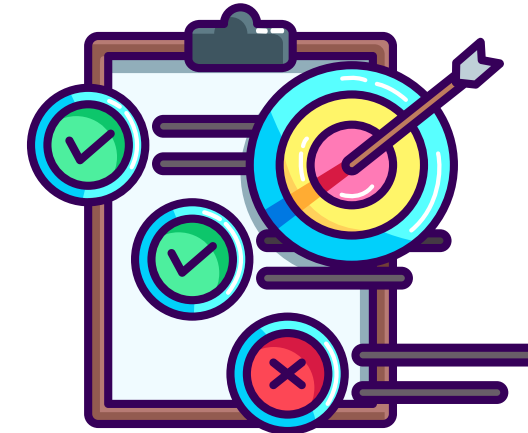

# PROBLEM

*Tourists struggle with:*

- **Booking multiple travel services separately.**
- **Managing transportation delays and availability.**
- **High traffic congestion, causing delays in travel.**
- **Unclear travel options for long-distance journeys.**
- **Lack of real-time tracking and vehicle availability updates.**

# AIMS

- Develop a centralized and efficient travel management system.
- Provide a seamless experience for tourists, managing transportation, accommodations, and activities.
- Offer Basic Ride (bike, car, van, three-wheeler) and Express Ride (air taxi, train) options.
- Reduce travel time and improve booking convenience.
- Integrate real-time tracking and automated scheduling.

Pearlora

# OBJECTIVES

- Develop a user-friendly platform for booking and managing trips.
- Enable real-time vehicle tracking for safety and convenience.
- Introduce Express Rides (air taxi, train) for faster long-distance travel.
- Implement destination booking to simplify trip planning.
- Improve transportation efficiency with optimized vehicle management.
- Ensure secure payment methods

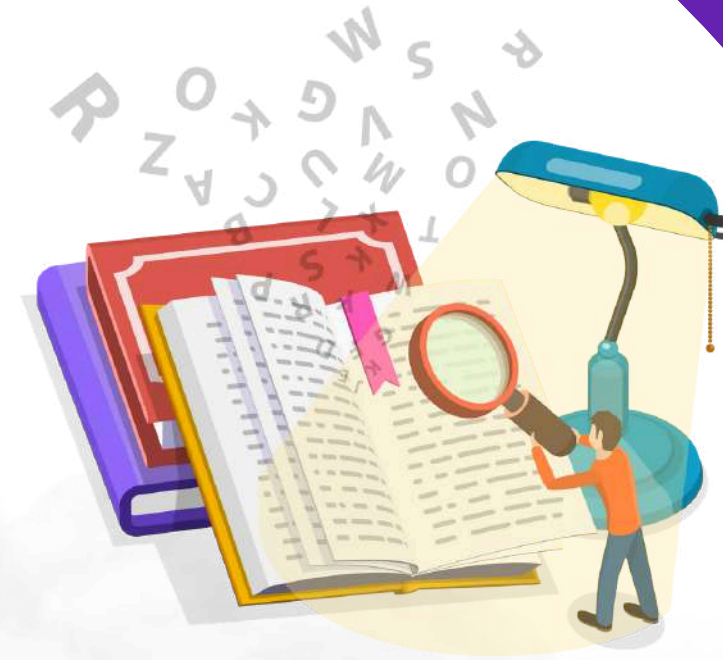

Pearlora

# LITERATURE REVIEW

+

- **Existing Travel Booking Systems:**

Focus on separate bookings (hotels, transport, activities).

Lack real-time vehicle tracking and optimization.

No all-in-one integrated travel experience.

- **Innovations in Smart Travel:**

IoT-based GPS tracking improves vehicle efficiency.

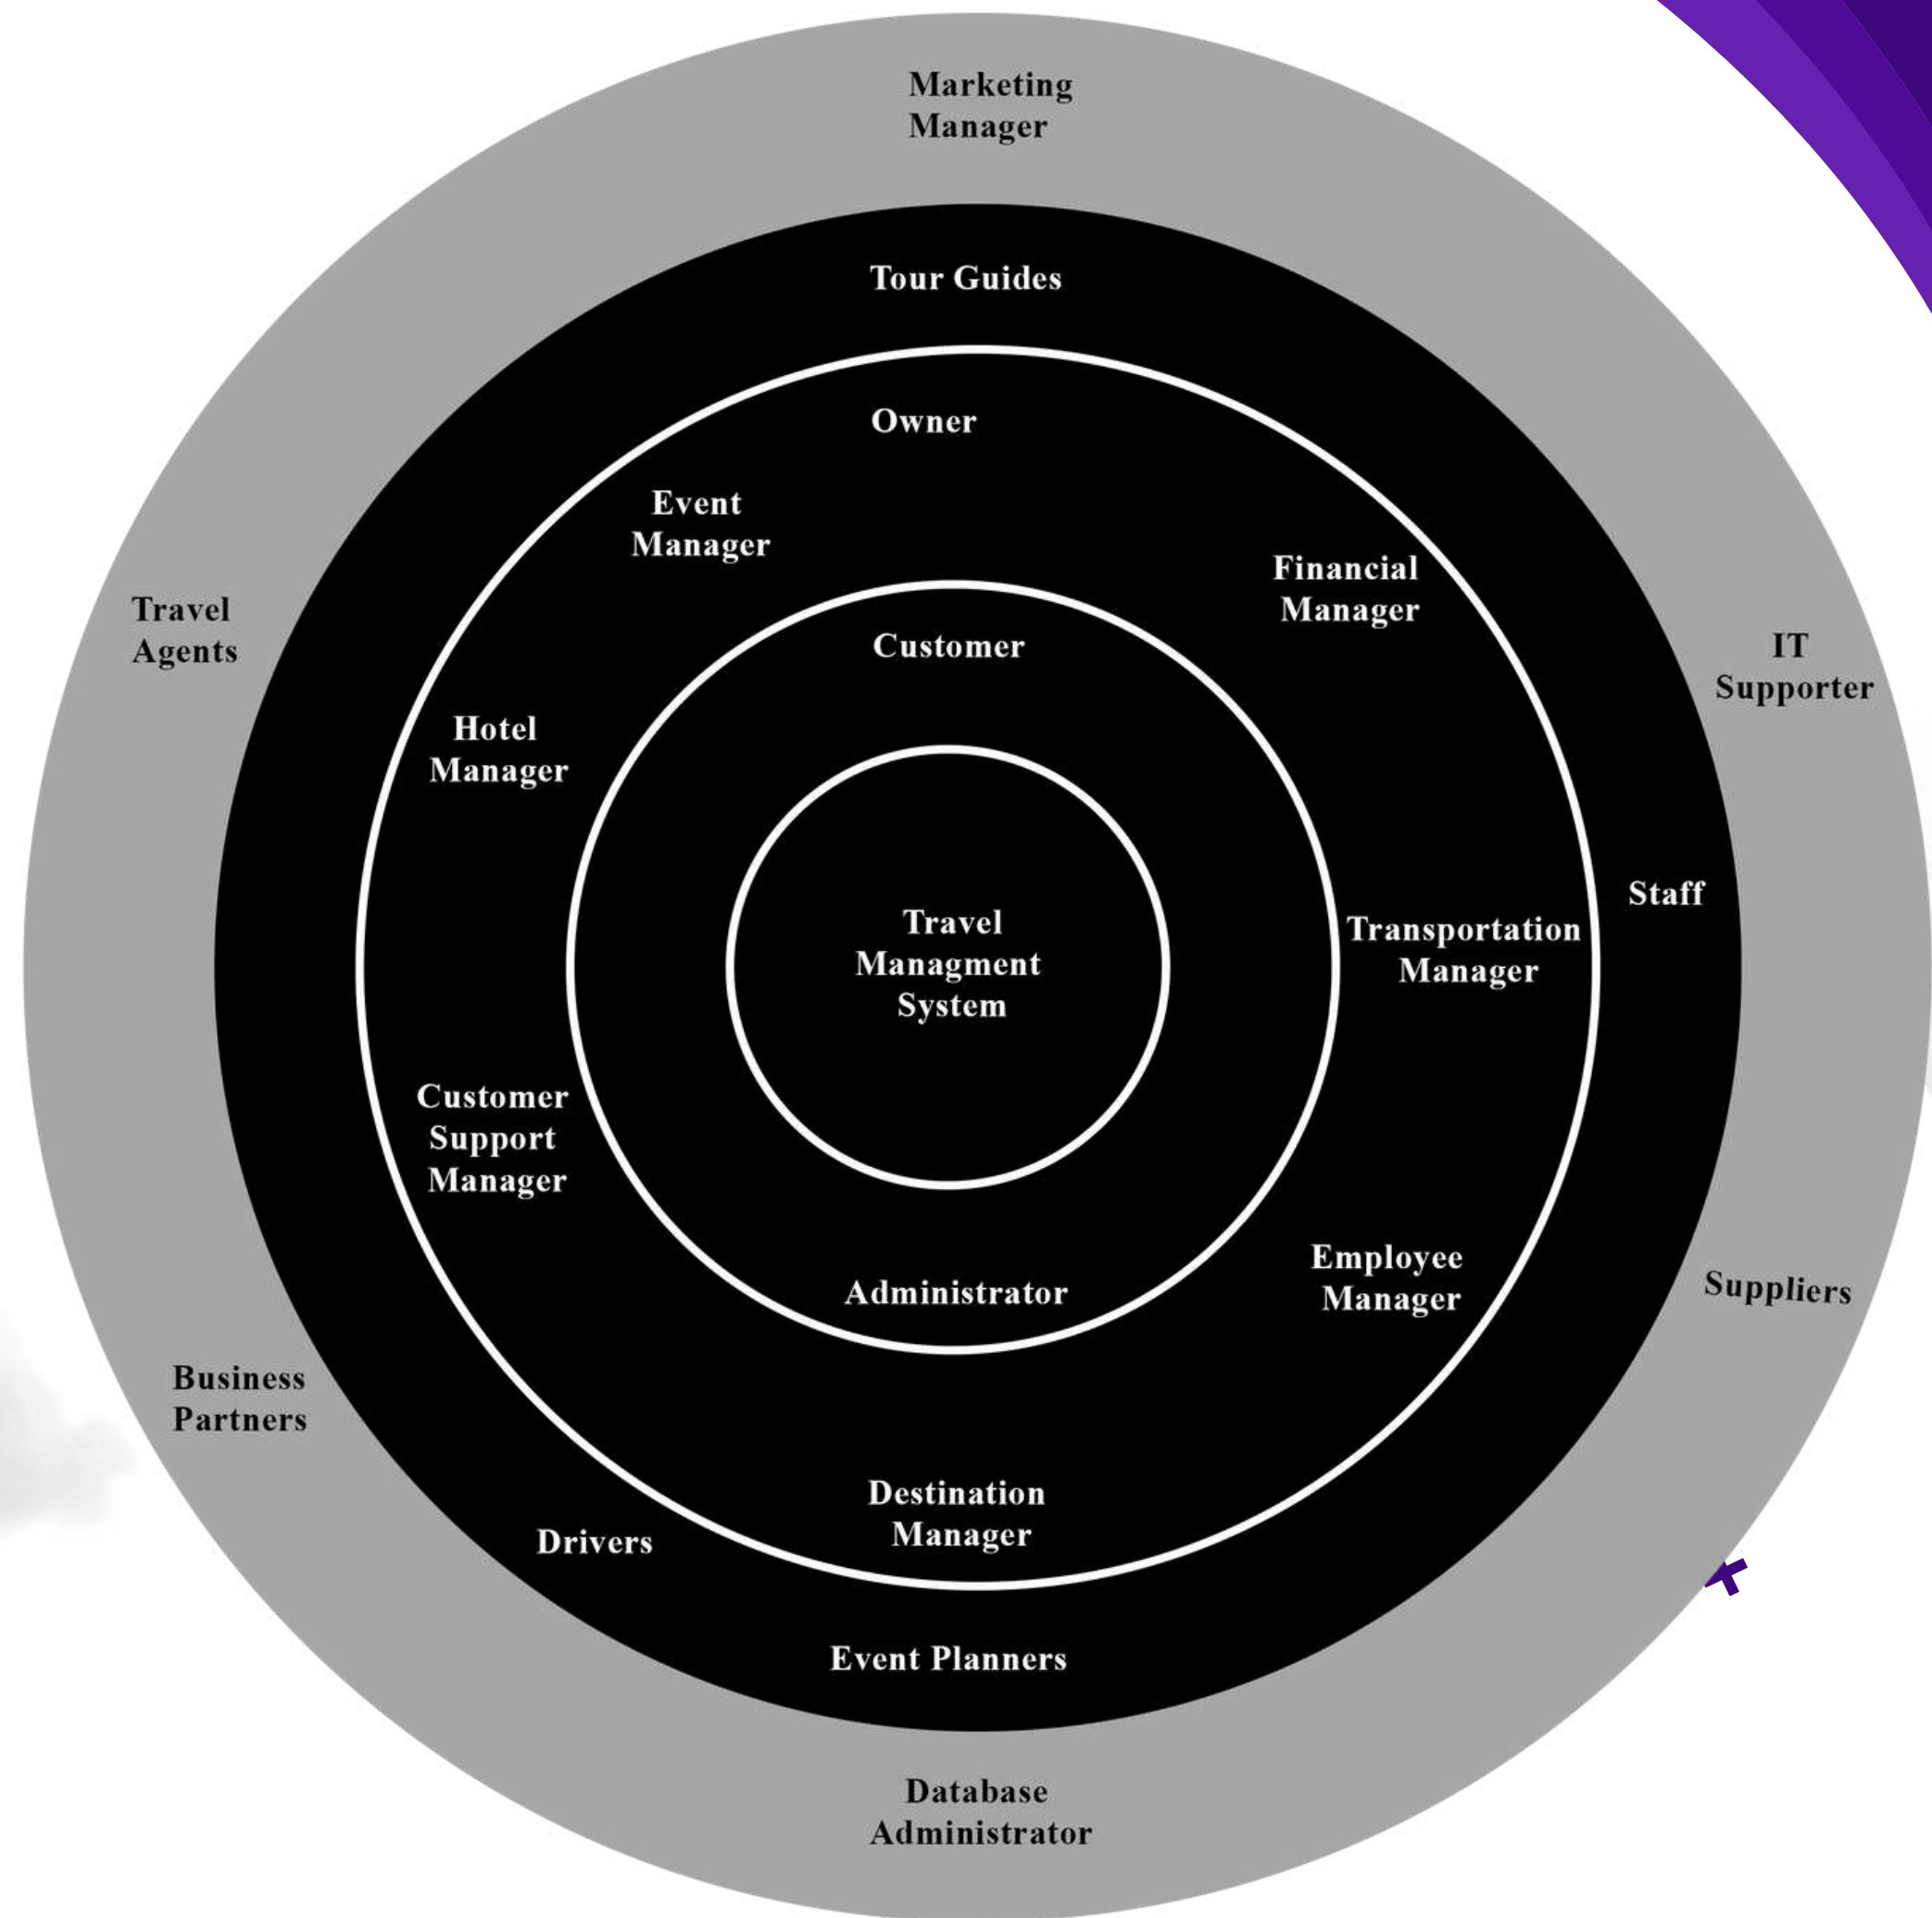

Integration of express rides (air taxis, trains) reduces travel fatigue.

Easy Pay Payment Integration

+

+

# SYSTEM OVERVIEW

# METHODOLOGY

+

## Agile Development Methodology

- Approach: Agile (Iterative, flexible, and user-driven development).
- Framework: Scrum (structured workflows for efficiency).

## Scrum Implementation

- Sprints: 2-week cycles delivering functional modules.
- Sprint Planning: Prioritization based on business needs & user feedback.
- Daily Standups: 15-minute meetings for progress tracking.
- Sprint Review & Retrospective: Evaluate, collect feedback, and improve.
- Product Backlog: Features continuously updated
